

TAKE WI-FI TO THE SKY

Advantage Future Tech (AFT) has been appointed as the global exclusive authorized distribution partner for the Honeywell JetWave™ Radome and AIM Kits – an integral part of their inflight connectivity offering for commercial, business and military platforms.

Honeywell's JetWave™ satellite communications terminals enable global consistent connectivity via Inmarsat Aviation's Global Xpress (GX) Ka-band network. Designed to provide broadband-class data connectivity, the hardware and network are optimized for mobility to provide a consistently-outstanding passenger experience all over the world. Passengers can experience the same Wi-Fi connection at 40,000 feet as they would on the ground.

Serving commercial and business aviation, as well as military and government customers worldwide from offices in Switzerland, Singapore and the USA, AFT will ensure you have installation kits, including the radome required to upgrade your connectivity solutions with minimal downtime or disruption to your operation.

AFT is a global distributor of OEM turbine engine parts, avionics, satellite connectivity and UAS and UAM product portfolios, covering all aftermarket segments. Stocking parts at warehouses in Singapore and the USA and with over 40,000 parts in stock, AFT offers same-day shipping with a 95% fill rate with 24/7 on call AOG assistance.

HOW TO ORDER

All orders for Honeywell JetWave Radome and AIM Kits (Part Number SCD-90401395-01) should be placed directly with AFT from the Effective Date until December 31, 2024. Purchase orders to AFT must contain the following information:

- Purchase Order number
- Part Number: SCD-90401395-01
- Aircraft type, Serial Number, and Registration
- Complete end-user name and address
- Shipping method and account
- An appropriate requested date
- Correct pricing (if any)
- Work scope and reference to any applicable Honeywell Sales Bulletin, Special Pricing or Program
- All enquiries regarding order status should be directed to AFT
